The screenshot shows the 'GLOBAL WEATHER' interface for Los Angeles, California. At the top, there is a search bar labeled 'Find Local Weather' with a placeholder 'Enter city or zip code' and a red search button. Below this is a navigation menu with links: Weather Home, 2-Day Detail, 7-Day Forecast, 15-Day/Weekend, 48 Hour by Hour, Commute Hours, Air Quality, Global Hi's/Lo's, Severe Weather, Historical Climate, Marine Forecast, Tide Forecast, Weather Facts, Airport Delays, Astronomy, and Ski Report. The main content area for Los Angeles, California, shows 'Current Conditions' with a temperature of 61°F (feels like 61°F), humidity at 90%, and a compass icon. To the right, a 'Forecast' section lists: Friday Afternoon (63°F, Light showers, Overcast, Mild), Friday Evening (60°F, Sprinkles, Cloudy), Friday Night (57°F, a few showers, Mostly clear, Cool), Saturday Morning (60°F, Sunny, Cool), and Saturday Afternoon (66°F, a few showers, Overcast, Mild). Below the forecast is a 'Severe Weather' section with a warning icon and the text 'Severe Weather Warnings/Alerts'. At the bottom, there are 'Weather Maps' (Currently, Forecast, Satellite) and 'Weather Locations- Customize' with a red 'undefined' label and a small icon set.
